

HITANSHU VARIA

Vadodara, Gujarat | variahitanshu@gmail.com | +91-9106402230 | github.com/Hitanshu-Varia |
linkedin.com/in/hitanshu-varia

Summary

Oracle Cloud Infrastructure certified AI engineer and Computer Science undergraduate with proven hands-on experience architecting production-grade GenAI systems — including advanced RAG pipelines, LLM-based agentic workflows, and GAN implementations. Engineered end-to-end AI-powered SaaS products integrating hybrid retrieval, neural reranking, and hallucination-correction layers. Passionate about building reliable, scalable, cloud-native solutions for mission-critical environments.

Education

Bachelor of Technology — Computer Science & Engineering

2024 – 2027

Charotar University of Science and Technology (CHARUSAT), Anand, Gujarat

CGPA: 8.36/10.0 (5th Semester) · Relevant Coursework: Data Structures, Algorithms, Databases, OS

Diploma — Computer Science & Engineering

2022 – 2024

Drs. Kiran & Pallavi Patel Global University (KPGU), Vadodara, Gujarat

CGPA: 8.38/10.0

Professional Experience

Data Science Intern (Virtual)

May 2025

CodeAlpha

Remote

- Completed hands-on data science tasks involving end-to-end pipelines — data collection, cleaning, and preprocessing of real-world datasets to ensure quality inputs for downstream analysis.
- Built and evaluated basic predictive models using supervised learning techniques, applying exploratory data analysis (EDA) to extract actionable insights from structured data.

Web Developer Intern

2023

NMR Infotech Pvt. Ltd.

Vadodara, Gujarat

- Developed and deployed responsive WordPress websites for 3 clients, achieving optimized performance and cross-device compatibility through systematic debugging and performance tuning.
- Engineered client-facing solutions by translating business requirements into technical specifications, resolving support issues and consistently delivering updates within agreed timelines.

Projects

Advanced RAG Pipeline — Production-Grade Retrieval System

Apr – May 2026

Tech Stack: Python, Qdrant, BM25, Cohere Reranker, HyDE, RAG-Fusion, Cross-Encoder, LLM

- Architected a multi-strategy RAG pipeline combining hybrid vector + BM25 retrieval, contextual chunk enrichment, and RAG-Fusion via reciprocal rank fusion — achieving a **35–49% retrieval accuracy improvement** over baseline vector search.
- Engineered advanced query intelligence layers including Query Decomposition (sub-question splitting), HyDE expansion (Hypothetical Document Embeddings), and Cohere neural reranking for top-k candidate selection.
- Implemented a CRAG gate for intelligent web-search fallback and a self-critique module for hallucination detection and automated answer correction, significantly increasing response reliability on out-of-corpus queries.

StyleFusion — Virtual Try-On SaaS

Nov 2025 (In Progress)

Tech Stack: Python, Generative AI, Computer Vision, SaaS Pipeline

- Designed an automated B2B SaaS pipeline enabling fabric retailers to deliver Virtual Try-On experiences using only fabric and customer images, targeting a **30% uplift** in conversion rates.
- Engineered an end-to-end cloud-ready image generation pipeline capable of serving many concurrent retailer clients with scalable inference.

Smart Mail Agent

Feb 2025

Tech Stack: Python, Local LLM, Gmail API, Google Calendar API, Agentic Framework

- Architected an LLM-powered agentic chatbot integrating Gmail and Google Calendar APIs, automating email triage and scheduling workflows for HR teams and reducing manual processing time by 50%.
- Implemented a local LLM pipeline ensuring data privacy compliance, eliminating reliance on third-party cloud inference for sensitive HR communications.

Summary Maker — GenAI Presentation Summarizer

2024

Tech Stack: Python, LLM, PowerPoint Parsing

- Built a GenAI tool that ingests PowerPoint presentations and auto-generates structured summaries at three complexity levels (basic, intermediate, advanced), reducing document review time by 70%.

Handwriting GAN

2024

Tech Stack: Python, PyTorch, Generative Adversarial Networks

- Developed a Generative Adversarial Network capable of replicating personalized handwriting styles, achieving visually authentic generation with robust training stability techniques.

FitPro — Personal Fitness Platform

2023

Tech Stack: Python, REST APIs, YouTube Data API

- Launched a full-featured fitness web platform providing exercise search, BMI-based meal planning, and YouTube-integrated workout recommendations for gym users.

Skills

Languages: Python, JavaScript, HTML/CSS, Bash (Linux CLI)

AI / ML: Generative AI, LLMs, Advanced RAG, Agentic Frameworks, GANs, Machine Learning, Qdrant

Cloud & APIs: Oracle Cloud Infrastructure (OCI — AI Foundations Certified), Gmail API, Google Calendar API

Databases: SQL (Fundamentals)

Tools & Platforms: Git, GitHub, WordPress, VS Code, TRAE

Core Concepts: OOP, Problem-Solving

Certifications

NPTEL Elite Certificate — Cloud Computing

Jan – Apr 2026

IIT Kharagpur (NPTEL / SWAYAM) — 12-week course; Score: **87%** (Top 5% Topper) · Assignments: 25/25 · Proctored Exam: 62.24/75.

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

August 2025

Oracle — Covers OCI AI services, Generative AI, LLMs, machine learning fundamentals, and cloud AI architecture.

Hackathons & Achievements

- **Build with TRAE @ Vadodara Meetup (April 2026)** — Recognized for demonstrating enthusiasm, curiosity, and a hands-on approach while building AI-native solutions using TRAE and MiniMax AI; received Certificate of Participation from TRAE × MiniMax.
- **SSIP Hackathon** — Developed an AI-driven solution addressing a real-world problem statement under competitive conditions; collaborated in a cross-functional team to deliver a working prototype within 48 hours.
